17 July 1963

MEMORANDUM FOR: AD/OSA

SUBJECT : Action Items from Today's DCI Meeting

As was discussed between Colonels Giller and Ledford, the following action items have been levied on DD/R/OSA:

25X1C

a) There are apparently RB-57 photos taken by the ▌▌▌ available for evaluation. There seems to be some confusion about the various channels through which these were obtained, and the DCI indicated that maybe the ▌▌▌ had a capability to do their own high altitude photography. The DD/P was directed to pull together a short study for the DCI on this whole question. We are to work with ▌▌▌ Deputy to ▌▌▌ who is on two weeks' military leave.

25X1A
25X1A

b) The DCI has decided to convene the Purcell Panel for one day during the first part of September for a report of actions taken on their recommendations. This will be followed by a complete report to the President's Foreign Intelligence Advisory Board on 16 September. The DCI will make arrangements directly with Purcell. However, I suspect we will have to handle staff support. Please check with ▌▌▌ on this. 25X1A

c) While there was considerable enthusiasm for our carrier take-off and land recovery exercise next month, there was some difference of opinion ▌▌▌ whether to use Lockheed pilots or military pilots ▌▌▌. We are directed to ▌▌▌ for this operation for at least the DDCI's approval. Suspense: 25 July.

d) It is requested that you prepare a very short summary of the comparable development timetables of the B-58, B-17 and A-12. I think we will send this to DDCI. Suspense: 24 July.
